PROPERTIES (each)

20-sided die ("d20")

10-sided die ("d10")

1 Master Score, 15 Matrix Scores

PERFORMANCE

Each performer begins by rolling d20. d20 face values correspond with directives on the Master Score. If the directive is an initial-caps line of text, no further method is required—simply sound the text as written. If directed to a PHONETIC, SYLLABIC or MOT Score turn to the Matrix type & number listed, then roll d10. d10 face values correspond with Matrix row/column values. Performers may choose to sound row or column. (Note: PHONETIC & SYLLABIC Matrices employ International Phonetic Alphabet graphemes; cf. Pronunciation Key as necessary.) Pitch, volume, duration & vocal style TBD by each performer or consensus.

After completing first Master Score directive, roll d20 again & repeat above instructions. Performance duration TBD by consensus &/or constraint.
